United States Patent [19]

Bulovic et al.

[11] Patent Number: **6,046,543**[45] Date of Patent: ***Apr. 4, 2000**

[54] **HIGH RELIABILITY, HIGH EFFICIENCY, INTEGRATABLE ORGANIC LIGHT EMITTING DEVICES AND METHODS OF PRODUCING SAME**

[75] Inventors: **Vladimir Bulovic**, Metuchen; **Stephen R. Forrest**, Princeton; **Paul Burrows**, Princeton; **Dmitri Z. Garbuzov**, Princeton, all of N.J.

[73] Assignee: **The Trustees of Princeton University**, Princeton, N.J.

[*] Notice: This patent issued on a continued prosecution application filed under 37 CFR 1.53(d), and is subject to the twenty year patent term provisions of 35 U.S.C. 154(a)(2).

[21] Appl. No.: **08/774,119**

[22] Filed: **Dec. 23, 1996**

[51] Int. Cl.⁷ **H01J 1/62**; H01J 63/04

[52] U.S. Cl. **313/504**

[58] Field of Search 313/504, 506, 313/507, 509, 499; 428/421, 690, 691

[57] ABSTRACT

An organic light emitting device (OLED) having an inverted structure including a cathode layer which is deposited on a substrate and on top of which an electron transporting layer (ETL), an electroluminescent (EL) layer, a hole transporting layer (HTL), a protection layer and an anode are deposited in sequence. The inverted OLED (IOLED) provides improved longevity, flexibility and efficiency over conventional OLEDs.
